

KAMRAN PATHAN

Software Engineer — React · TypeScript · Frontend

Bangalore (Open to relocate) | +91-9730632772 | kpwebdev18@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 5 years of experience building clean, well-tested, modular frontend applications using React and TypeScript. Hands-on problem solver with strong JavaScript fundamentals, browser performance awareness, and a bias toward continued learning. Actively leverages AI-assisted development tools including GitHub Copilot and Claude Code within established engineering standards. Currently architecting a multi-tenant SaaS ERP platform independently — owning frontend, backend, security, and deployment end-to-end.

TECHNICAL SKILLS

Core Stack: React, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Redux Toolkit, Context API

React Expertise: React Hooks, Custom Hooks, memoization, lazy loading, component lifecycle, modular architecture

Browser & Web: DOM manipulation, CSS/SCSS, responsive design, WCAG accessibility, cross-browser debugging

AI Dev Tools: GitHub Copilot, Claude Code — daily use for writing, testing, and iterating on code

Testing & CI/CD: Jest, React Testing Library, Mocha, unit & component tests, GitLab CI

Backend & API: Node.js, Express.js, REST APIs, PostgreSQL, JWT Authentication

PROFESSIONAL EXPERIENCE

Aloha Technology Pvt. Ltd.

Software Engineer | July 2021 – Present

- Implemented frontend components and features within established design and engineering parameters, contributing to UX improvements across enterprise applications.
 - Wrote clean, well-tested, modular UI code — maintaining unit and component-level tests with Jest and React Testing Library.
 - Used AI-assisted tools including GitHub Copilot and Claude Code to write, test, and iterate on code within established engineering standards.
 - Debugged and resolved issues across component integrations, using browser DevTools and performance profiling.
 - Implemented server-side pagination for data-heavy enterprise tables, significantly reducing page load time in production.
 - Conducted code reviews, incorporated feedback, and communicated progress clearly within cross-functional teams.
 - Mentored junior engineers through structured code reviews and knowledge sharing sessions.
-

KEY PROJECTS

Independent ERP SaaS Platform — Multi-Tenant Accounting & Business Management

Tech Stack: React, TypeScript, Redux Toolkit, Node.js, Express.js, PostgreSQL (RLS), JWT Auth

- Architecting a multi-tenant SaaS ERP from scratch — independently owning product design, system architecture, frontend, backend, security, and deployment.
- Implemented PostgreSQL Row Level Security (RLS) for tenant isolation and JWT-based RBAC for secure data access.
- Built double-entry accounting engine with GST-compliant invoicing and VOID-based audit-safe transaction reversals.
- Delivered 20+ screens across 5 modules with server-side pagination, memoization, and modular component architecture.
- Maintained comprehensive unit and integration tests using Jest and React Testing Library.

Anchorock – Enterprise Resource Management (ERM) System

Tech Stack: React, Angular 2, TypeScript, JavaScript, HTML, CSS, GitLab

- Led frontend migration from Angular 2 to React across 10–15 screens covering 4–5 enterprise modules.
 - Implemented server-side pagination resolving critical page load performance issues in production.
 - Collaborated with backend team on API contracts and resolved complex component integration issues.
-

EDUCATION

Bachelor of Engineering — N B Navale Sinhgad College of Engineering, Solapur
